PACKAGED DRIVE SOLUTIONS FOR FAN & PUMP APPLICATIONS

Multiple Configurations for Flexibility

Available in Combination VFD and Bypass configurations with application specific bypass control logic for pumps & cooling tower fans or for ventilation fans.

Embedded Fan & Pump Functions

Versatile AC Drives easily configured to handle almost any fan, blower, or centrifugal pump application.

Space Saving Design

Space Saving, Narrow Form Factor Solution Utilizing Slim Type HVAC Series Drive.

Additional pump specific functionality within the drive to provide a robust pre-engineered packaged drive solution for variable torque pump and fan applications. These drives are excellent options for Water, Wastewater and HVAC industries.

BENEFITS OF THE HVAC VFD LINE

- Energy Savings
- CO₂ Emission Reduction
- Low Harmonic Distortion
- Reduced Mechanical System Stress
- Simple and Quick Installation
- Standard 3 Year Warranty
